sufficient population to enter the Union as a state, for he believes in a great feture for the Hills. He says the immense development of the gold region will be the saverion of the country .- Omaka Republican.

IMPENDING DANGER.

From the Omaha Republican.

The most serious question agitisting the minds of western people to day, even more than the compromise bill or national party issues, is that involved in the thretened invasion of the grass hopper army. The conference of western governors in Omaha, together with the facts and theories there alvasced have resulted in much agitation and consequent good. The feeling of listrust and fear is vearing away under positive knowledge of the Auditor. strength of the enemy and the kind of weapons that must be used in its destruction. All over the states and territories involved in the annual visitation of this plague, a careful watch is being kept of the dormant foe, now embedded in the earth in the shape of b.d. of eggs. Experiments in hatching out the young, subjecting them to cold and freezing are in order to learn what part nature will act in their destruction when the ground thaws and freezes again in early spring.

The Sioux City Journal strongly recommends the so wing of barley as a means of securing a crop, which fur-The debt statement shows a decrease | makes one of the best sources for stock in the national debt during January of feed. It is more nutritive than oats by [2] per cent., and makes better pork than corn. Barley as an ordinary crop is underestimated but it is gaining favor in Iowa, now third in the list of parley growing states. The yield here averagede in 1875, 274 bushels per acre, and it is always in

demand at high prices. Four or five years ago as soon as the around they worked a little damage may deem best. to growing grain, destroying perhaps a teeth of the crop, and then took wings and flew away. Our harvest Henry Wast Beecher in his travels that year was a large one. May not the 'hoppers that hatch out the coming spring do likewise?

> We will have to remind the public again of the purport of the law governing and protecting news papers, which says that an order of disc ntinuance must be accompanied with cash to pay up all arrearage. Unless this is done the publisher can continue to send the paper, and collect by law whether they are taken out of the Postoffice or not. - Ex.

Farmers of Nebraska, look to live stock to make your revenues. Cat tle, sheep and hogs will pay your grocery bils, and put money for you in the banks. There is one article which the masses of this country and England cannot do without-except under compulsion; and that is animal food. Where in the wide world can beef be raised at a cneaper rate than in Nebraska; and, as for the market, why that is world wide. The experiment of shipping fresh beef from the United States to England is now no longer an experiment, but an assured suecess. We read in the latest issued report of the department of Africulture that six steamers of the Anchor the legislature, prohibits the issuing line have been provided with refrig of a license to sell liquors, in any town erating apalatus for the transportation city or precinct, where a majority of of fresh meat across the Atlantic. the people of said town, city, or pre- Cattle are brought by rail to the sea einct decide that there shall be no li- board and killed the night before they cense; and the bill fixes the sum to be are shipped. BEGINNER.

Scott, Neb., Feb. 3, 1877. Eo. CHIEF.—The Farmer's Institute held at Walnut Creek School House, was a very profitable and pleasant affair and a di-position was manifested which will ultimatly result in good to the agricultural interests of our community.

The following resolution was unani- 13tf

mously adopted : Resolved, That we pledge ourselves individually to use every effort to produce something for exhibition at our next fair, and to promote the interest of our agricultural society-also one requesting the President to call an institute at Red Cloud some time during pest were able to commence skipping the session of Court in February as he

The present season of the year could be profitably employed in holding Institutes over the county in the various precincts and endeavor to create an interest in our calling, which will make our next fair a noticeable feature in our improved and progressive march toward success Farming.

BATIN, Neb., Feb. 5th, '77

R. B. F.

ED. CHIEF : - I have noticed several communications from Stillwater, recently, signed W. W. B., who has evidently hit upon this plan to advertise his business. He urges the farmers to plant hedge and he agrees to put out the hedge for them and insure a live stand of plants for 25 cents per rod. The farmers to prepare the ground, and board the hands and teams while the work is being done. The farmers must als tend the hedge and keep it clean of weeds, and in a good growing condition. Now I would not willingly injure Mr. W. W. B's business, and do not wish to be understood as trying to do so, but cannot refrain from making a little calculation on the relative cost of bedge plants and the cost of putting out. Plants can be bought for \$2.00 per thousand. Not more than 20 plants are required per rod, or 1.600 to the quarter mile, which would cost \$3,20. One man would easily plant the 80 rods in a day at \$1.50 per day, making the cost of plants and setting \$4.70. Now for the difference W. W. B would have at 25 cents per rod \$20.00 for putting out the 80 rods. The dif ference in the cost is \$15 30. Pretty good profit for one day's work. C. N. R.
